S. S. LURLINE

Dear Elmer,

We are still talking with glowing terms about the grand time we had in Houston. You had everything so beautifully planned - from the flowers that arrived quite unexpectedly until we got on the train. I loved the Emerald room and it was lots of fun to see Frank Sinatra. He

part of the country. It is so barren
and still so beautiful. Our stay there
seemed to both of us as quite a liquor
one still lots of fun.

I was wild about San Francisco -
that is except for climbing the hills. Our
Cousin that we visited lives in an apartment
on the highest point in the city - so we found
ourselves climbing up having chopped around
all day. The view from her place is
really quite breathtaking as we could
even look down to on the 'top of the Mark'!

Of course the high point was our actual sailing. Confetti was given out and everyone tossed it over the side before we pulled out and they also had a hand! Really it was most exciting and awfully pretty. We had hardly recovered from the excitement of that when we went below to our room and found the flowers had been delivered. Your roses etc - are still lovely -

Again many thanks for all you did - please tell ~~Ted~~^{Ted} I appreciate it too!

With regards -

Rosalie

is so much better in person!
Lunch was delicious as you well know
and driving around and seeing the
homes always gives me a so much better
idea of the city. Your hospital is
really a magnificent building. We were
really quite sad when we left because
it meant that part of our trip was
already behind us - and a part we had
both looked forward to.

We had lots of fun in Tucson
and I found it a most intriguing
