Tuesday nite

My darling Sweetheart:

I hope you don't mind me writing you a wee note tonite — I haven't much to say but it sorta helps my feelings if you know what I mean — Jean came in with a letter she had received from you — so that helped —

I haven't had quite so much company today but enough — Yesterday I was pretty pood. I'm still pretty sore but just the incision, no gas pains. Everyone thinks I have made history as far as my progress is concerned. Dr Lockwood is taking the best of care of me — I almost hate to get well —

Dr Lockwood consulted Dave  
Whitfield today about the old "fleabite"  
and they both decided it wouldn't  
be necessary to do anything about  
treating me - I'm so active - in they  
feel there won't be any danger of  
complications -

I won't write any more now  
but I'm still missing the letter that  
didn't come today.

All my love,

Dorinda
