Sweetheart:

Your "quackie" just arrived and I already feel much better. The weekend would have seemed long without some kind of word from you, so keep sending me notes when you don't have time for longer letters. Hope your new secretary will soon be able to take some of the extra load off your shoulders. Wish I could be closer to my honey right now - maybe I could help. Jack is probably on his vacation by this time so that means the pressure will be pretty hard for you the next couple of weeks. Get all the rest you can love - I don't

want you to take any chances  
even though the "lep" is a thing  
of the past. Let me know when  
you start operating. Oh — I  
think you are so wonderful.

I want you to know I am  
completely over my cold — so  
don't worry about your gal.  
I took Crupticillin for about  
four days and now I feel first  
rate. How about your sore throat?  
That's the way my cold started so  
be careful!

No doubt you have received the  
sketch — it don't say you're ugly —  
that's silly. You know I think  
you are perfect looking from  
head to toe. How could I love  
every part of you so much if  
I didn't think you were  
beautiful — ??? ? ? ?

Gusta writes that she and Bill are planning a trip South. Will you be able to see them while they are in B'ham? I told you about the silver candle sticks - they are so lovely!

Must hurry along to the mail box with this letter if you are to receive it tomorrow. I miss you sweetheart and more so when your letters dwindle - Just to touch your hands would be divine - How long must I wait?

All my love,  
Dorinda

Dear Children:-

Idene & Tom, we received the literature on the dish-washer and sent it on to Elmer Key. I suppose you received the same thing as we gave them your name and address. We think this will solve your dish washing problem for the present, and if you young people think well of it we can get it for you.

This is a fine day for many kinds of work and Roy and I will take a swing around at windows and screens and house cleaning generally. The sparrows started to build nests between the flue and the house. I put wire in to block them and thought I did a good job but Mr. sparrow pulled the wire out and went on with his nest building; that reminds me of the old negro's statement that "critters have more sense than folks".

Elmer Key, Larry's report on your young friends who stayed on at Presbyterian confirms your judgement as to that situation. It occurs to us that a return to N.Y. and Memorial would require more training on your part and we consider you a well trained man. Away above the average according to your experience in Houston and your observation in Birmingham. When you are in Birmingham a telephone call will put you in touch with Dr. Lyons who can give you the situation in Birmingham.

As per usual, we have a proposition for selling the home place. This time the offer is \$9500.00, but there is lots of spade work before we consider it a bonified offer or even possible. Rumors persist that a nurse and her husband have paid \$20000.00 for the Lembley place. It has changed occupants.

The A.E.A. meets here this week and we will be mixed up in that. Some of the activities will call out mother's long dresses but not my tuxedo. Fourteen candidates are out for governor and many for other offices and the public schools are in need of much more money so there will be much politicking. Our primary will be May 2.

According to our latest schedule, Gusta & Bill leave home this afternoon for Dr. & Mrs. Cutten and it looks like a propitious day for a delightful visit. We are looking forward to the time they will come on here. Elmer Key hopes to get here for a few days while Gusta and Bill are here.

Idene, we hope you are feeling better by now. It is fine that you have a comfortable home and surroundings, and Maria can help some.

Love and best wishes from mother and papa. Your father, E. O. Sanders
