Dear E. K.

Gusta & I went to N.Y. the other day & while there we spent your money, we think to good advantage. After returning a couple of <sup>(bags)</sup> 4x7 Orientals. Having left two we went down to Lafayette. We heard several Radios on several speakers we decided to get your choice of craftsmen radio amplifiers & tubes and Girard record changer. They are being expressed to us right now. Your friend who was very helpful suggested that we put an outside aerial up right and rather a wire in the attic he thinks with the built in antenna that will be enough. We also bought a studio couch at Ford & Taylor to put in the den. Looks like they first for now in - my, but this keyboard work is slow & being a custom job as each woman wants something different and they are wooden keyboards. We got the living room & dining room thermopane windows put in the attic & they certainly are fancy. Gusta is worrying her heart out about drapes, linoleum, tile & paint colors. She is surey sister when it comes to making a decision.

We got a letter from Iden today. First since Gusta told her off about worrying about what everyone will say & she took it right & will be better for it. All seems well with them for the moment. Tom is going on a reducing diet. I den dreads it but thinks he will not stick as do I.

Last night we had one of those beautiful soft snows that belong to the trees. The sun came out

this morning and it is like fairy land. It will probably mostly melt off today.

I get my new studbooks today - am looking forward to it. We get our 150 baby ducks tomorrow. The town children look forward to it each year.

Business is going according to plan - slow at present.

Glad to hear that you are really enjoying yourself lately. It is true that you live as well as work. Accomplishment is primary, but you can't live a day twice either and a full life has both.

It is really a bit embarrassing to me to accept the radio but I want you to know that I do appreciate it - we both do - and want to thank you for being so kind & thoughtful to us. You are always 10 steps ahead of us.

Hope you can make it to a reunion & celebration of your folks this summer if not before.

as ever,

Bill
