HOUSTON

TEXAS

Apartment 10

Thursday - Sept. 6

My sweetest sweetness,

Your Monday letter came before lunch Wednesday and I felt so happy after reading it, mostly because you seem to be happier than you have been in years. The V. F. was not your kind of job - I know that now. However, I feel, the experience you gained there will prove to be invaluable to you in the future. Honey, I'm so proud of you being completely on your own in private practice. Even your bachelor apartment is good for you. The domestic experience will help to give you a better understanding of economics - ha!

I am really working hard at my new job and apparently I'm

2nd of it.
doing a good job - One of the
residents is trying to get me
transferred to 16 (abnormal A.P. + P.P.)
He sorta embarrassed me when
he said, "Dorinda, you are a
most unusual woman; you
have both brains and beauty.
And I might add the kind of
beauty he means is not the
skin deep kind. Darling, I know
you like to hear what other people
think about your sweetheart.

'Cause I am your girl - all
the love in my heart is yours.

You should see me giving
a conference to the students.

Conference #1, Lacerations ^{and} Episiotomies.

#2 { Dystocia
Subinvolution
Endometritis.
Mastitis
Cystitis

Also, I have a class every other day

with the mothers, "Discharge Instructions"!! Whee —

The classes are the least time consuming of all my duties — I grade nursing case studies — 3000 words each. The grammar + spelling is atrocious but I get quite a kick out of making the corrections. Some ~~of~~ ^{of} the studies are very good which always gives me more encouragement. Oh and I write individual ^{ward} reports on all the students. One of these days I shall send you a sample copy of one of the reports I have written.

Last Saturday I saw "Guys and Dolls". Monday I went to the theatre again — yes, you guess it, I saw "Guys and Dolls". The dates were different though.

Isn't it a scream.

Sweetheart, I so sorry you have had such a hard time with ^{the} private patient with all the the post operative complications. She will be all right, I not worried, 'cause she's got a good doctor taking care of her.

A classmate of mine in training is coming to visit me this morning and she plans to stay overnight, so I'm trying to rush through this note to you. Hope you can make sense out of it.

Oh my darling I do miss you more n more. When do you think we can get together again? As you know from past experience, it isn't good for us to be separated too long. It just isn't normal. All my love⁴ kisses
to my Sandy - your Sandra

P.S. An extra Kiss! X
